TSPS SOCIAL EVENTS

FRIDAY

Welcome Reception & Resident Awards

Join us for drinks and appetizers while we recognize the Resident Award winners. It's a great start to the conference – food, drink, and colleagues!

SATURDAY

YPS Committee Meeting & Luncheon

Are you 42 years or younger? Or are you in the first five years of your practice? Then join the YPS Committee and meet your peers over lunch.

Texas Legends Society Cocktail Hour

Are you a member of the Texas Legends? This prestigious event is open to those who have been a member of TSPS for 10 years or more and are 65 years or older. Join the current officers, past presidents of TSPS and honored VIPs as we toast and honor the Texas Legends!

TSPS Heritage Dinner & Casino Night

Don't miss this annual tradition! What a night to remember – a great meal with colleagues, casino games tables, a live band and fellowship with your colleagues!

ASSI[®]

HIDALGO SUBMENTAL FACE LIFT RETRACTOR

ASSI.ABR90626
55 x 12mm wide blade
w/ Wings, Fiber Optics &
Universal Adapter

ASSI.ABR90426
55 x 12mm wide blade w/
Wings, Without Fiber Optics &
Universal Adapter

Ideal Exposure For:

- Caudal aspect of platysmal plication.
- Low transverse platysmal division.
- Anterior cervical defatting and hemostasis.
- Submandibular gland resection.
- Medial SMAS dissection and fixation.

Retractor Features:

- Curved side wings expand visualization
- Fiberoptic endpoint elongates the optical cavity
- Polished Surfaces enhance illumination

INTRODUCING THE LATEST INNOVATION IN THE MENTOR[®] MEMORYGEL[®] BREAST IMPLANT LINEUP

MENTOR[®] MemoryGel BOOST[™] Breast Implant

WARNING:

- Breast implants are not considered lifetime devices. The longer people have them, the greater the chances are that they will develop complications, some of which will require more surgery.
- Breast implants have been associated with the development of a cancer of the immune system called breast implant-associated anaplastic large cell lymphoma (BIA-ALCL). This cancer occurs more commonly in patients with textured breast implants than smooth implants, although rates are not well defined. Some patients have died from BIA-ALCL.
- Patients receiving breast implants have reported a variety of systemic symptoms such as joint pain, muscle aches, confusion, chronic fatigue, autoimmune diseases and others. Individual patient risk for developing these symptoms has not been well established. Some patients report complete resolution of symptoms when the implants are removed without replacement.

The sale and distribution of Mentor Breast Implant Devices are restricted to users and/or user facilities that provide information to patients about the risks and benefits of the device prior to its use in the form and manner specified in approved labeling to be provided by Mentor Worldwide LLC.

Important Safety Information: MENTOR[®] MemoryGel[®] Breast Implants are indicated for breast augmentation in women at least 22 years old or for breast reconstruction. Breast implant surgery should not be performed in women with active infection anywhere in their body with existing cancer or pre-cancer of their breast who have not received adequate treatment for those conditions or are pregnant or nursing.

Breast implants are not lifetime devices and breast implantation is not necessarily a one-time surgery. The chance of developing complications increases over time. The most common complications with the MemoryGel[®] Breast Implants include reoperation, capsular contracture, asymmetry, and breast pain. A lower risk of complication is rupture. The health consequences of a ruptured silicone gel-filled breast implant have not been fully established. MRI screenings are recommended three years after initial implant surgery and then every two years after to detect silent rupture. Breast implants are also associated with the risk of breast implant-associated anaplastic large cell lymphoma (BIA-ALCL), an uncommon type of lymphoma. An individual's risk of developing BIA-ALCL with MENTOR[®] Breast Implants is low based on the incidence of worldwide cases.

Patients should receive a copy of Important Information for Augmentation Patients about MENTOR[®] MemoryGel[®] Silicone Gel-Filled Breast Implants or Important Information for Reconstruction Patients about MENTOR[®] MemoryGel[®] Silicone Gel-Filled Breast Implants. Your patient needs to read and understand the information regarding the risks and benefits of breast implants, with an opportunity to consult with you prior to deciding on surgery.

For detailed indications, contraindications, warning and precautions associated with the use of MemoryGel[®] Breast Implants. Please refer to the Instructions for Use (IFU) provided with each product, or online at www.mentorworldwide.com.

TEXAS LEGENDS SOCIETY Plastic Surgery in Texas is rich in tradition and TSPS honors our legacy through the Texas Legends Society. Membership in this group is for those who have been a member of TSPS for 10 or more years and are 65 years or older. This elite group of men and women have paved the way for many generations to follow. Join us as we honor them during the 2022 meeting with a variety of events.

Texas Legends Society 2022 Distinguished Speaker:

JAMES R. CULLINGTON, MD Austin, Texas

Our Mission:

Austin Smiles is a nonprofit organization whose mission is to provide sustainable surgical and post-surgical care to children born with cleft lip and cleft palate both in Central Texas and Latin America

After

Before

The Need:

1 in 700 babies are born with cleft lip and/or cleft palate. Children born with this condition often face: failure to thrive, feeding/eating difficulties, speech & language development, breathing & hearing impairments and mental health challenges.

Medical Mission Volunteers Needed!

Austin Smiles provides no-cost surgical and post-surgical care to children born with cleft lip and palate both locally and internationally. In 2023, we are expanding our medical mission trips, which requires increasing our volunteer capacity! Medical volunteers receive an opportunity to make an impact in the world, as well as receive educational training and leadership opportunities for specialized cleft care across various medical occupations. **We currently are seeking: surgeons, anesthesiologists, CRNA's, scrub techs, and nurses.**

Interested in becoming a medical mission volunteer? **Scan the QR code below and click on Volunteer!**

How you can help

With your generous support, Austin Smiles can continue to change lives. Donating towards or volunteering on a mission gives a child a chance to have a happy, fulfilling and healthy life. To donate or learn more about ways you can get involved, scan the QR code to the right or visit **www.austinsmiles.org**
